Species: *Bruguiera gymnorrhiza*

Bruguiera gymnorrhiza is an evergreen tree with many pneumatophores roots. It grows on the coasts and estuaries in mud, in places well-watered. It is one of the most widely distributed trees in the tropics. It is found in East Africa, Madagascar, Indian Ocean islands, South Asian coast, Australia and it has been introduced in Hawaii. *Bruguiera gymnorrhiza* wood is known for being waterproof, resistant and tough. It has been used for timber and the bark is high in tannins, so it has also been used for tanning.

Tree(s) planted in Project Eden Projects, Madagascar

In response to the large-scale loss of mangroves and upland forests in Madagascar Eden Reforestation Projects initiated the Madagascar Reforestation Project. The program began in 2007 and since its inception Eden has successfully planted over 16 million mangrove and dry deciduous trees in northwest Madagascar.
