Species: **Vochysia lehmannii**

The Saladiillo blanco grows in both inundation settings and in the savanna. It has beautiful yellow flowers during the early part of the dry season (December to February), and grows with a straight trunk, making it a visually very appealing tree. The bark has an insulating function, protecting the tree against damage during savanna fires.

Tree(s) planted in **Project La Pedregoza, Colombia**

This afforestation and reforestation project is located in the Orinoco River basin of Colombia. The plantation is designed to provide long-term economic sustainability for the adjacent natural reserve, dedicated to the conservation of local flora & fauna. We use natural farming techniques to do so.
