Species: *Rhizophora mucronata*

Rhizophora mucronata is a small to medium size tree, with strong apical dominance and distinctive aerial roots. It is found in the Indo-Pacific region. Its natural habitat is estuaries and coasts. There are several benefits provided by *Rhizophora mucronata*, it protects the coastline from floods and storms, it avoids coast erosion and its medicinal properties have been used for treating a number of diseases.

Tree(s) planted in **Project Eden Projects, Madagascar**

In response to the large-scale loss of mangroves and upland forests in Madagascar, Eden initiated the Madagascar Reforestation Project. The cooperation with Tree-Nation began in 2019 and since its inception, Eden has successfully planted over 10 million mangrove and dry deciduous trees with TN in northwest Madagascar.
